HIGGINS-SCHOOLEY

Holding high place among the summer weddings was that solemnized Wednesday afternoon at the home of Mr. and Mrs. Clarence Davis, when Blanche Olive youngest daughter of Mr. F. H. Schooley of Lethbridge became the bride of Mr. Gordon Higgins, son of Mr. and Mrs. Harry Higgins of Champion. The Rev. Peter Dawson performed the ceremony.

Summer flowers decorated the spacious rooms, while the arch under which the couple were married was beautifully decorated with pink and white sweet peas and streamers. Given in marriage by her father the bride was charming in her frock of silk lace and net made one flowing line to floor length with which she wore mittens. Her veil of embroidered silk net was becomingly arranged in cap shape and caught with clusters of orange blossoms. Her only ornament was a string of pearls and she carried a shower bouquet of Madame Butterfly roses and fern.

Miss Kate Pharis played the wedding music and during the signing of the register, Miss Ada Williamson, accompanied by Miss Rheta Campbell sang "I love you truly."

Following the wedding a buffet luncheon was served, the beautifully decorated table being centered with a three tier wedding cake. Those assisting in serving were: Mrs. Elliott, Mrs. J. H. Bestor, Miss Bernice Beatty, Miss Phyllis Bastin, Miss Myrtle Hopkins, Mrs. F. Clever, Miss Helen Higgins and Mrs. O. Hagg.

After the luncheon Mr. and Mrs. Higgins left by motor for Banff, where the honeymoon will be spent. For travelling the bride wore a swa gser suit of pale pink flat crepe. Her accessories were white. Many beautiful gifts were received by the bride, among which was a hand pieced quilt of the double ring pattern, made by Mrs. M. D. Miller in her 82nd year.

About sixty guests gathered to felicitate the bride and bridegroom. On their return they will reside on Mr. Higgins farm east of Champion.

Grade XII

For Champion

The committee who have been in charge of handling matters in connection with the teaching of Grade XII in the Champion school for the term 2032-34 have been successful in their undertaking. The parents were forced to put up a considerable sum of money in order that Grade XII might be taught and it is to be hoped that the pupils of Champion and district will do their bit by making every effort possible to make this a successful year in every way. Outside pupils will be admitted.

The car owned by G. Marks was badly damaged in a recent accident. It appears that Mr. Marks was blinded by the lights of an approaching car and turned over in the ditch. The driver was not injured.

A. Huggles entertained the Lake McGregor ball team to the show following their game with Champion on Wednesday evening. The score of the game was 4-1 in their favor.

Local & General

Chickenfry, Born This Year—at Campbell's.

Morley Hayes of Calgary is the house guest of D. Campbell this week.

Frank Hardisty of Spokane is in town looking after farming interests here.

Mr. and Mrs. Hoskins are expected to arrive in Champion this week.

Rev. S. R. Hunt formerly of Champion has accepted a new field of labor at Claramount Alberta in the Grande Prairie Presbytery.

Mike Thornton of Milo and L. Jopling spent the week end fishing at Waterton Lakes and Fletcher Creek.

Mr. and Mrs. Karta. of Olds are guests at the home of Mr. and Mrs. Clarence Davis.

Mrs. Guy Volsey was a bridge hostess on Monday when two tables of bridge were in play.

Miss Mary Bowman and J. Bowman were week end visitors at Waterton Lakes, guests at the cottage of Mr. and Mrs. Glen Peacock.

Mr. and Mrs. Theodore Roebuck are visitors at Calgary and Crossfield.

Oversh, Work Gloves, Work Shirts all raving to go to work at Campbell's.

Miss Gladys Rhodes was successful in passing her recent exam in music.

Mr. and Mrs. James Ellis, who have spent the past month holidaying at the coast returned to Champion this week. They report an ideal vacation.

Mr. Bob Barranger accompanied by Kenneth Gorsche returned from a holiday at Vancouver.

Mr. and Mrs. Harvey Young of Lethbridge are guests at the home of Mr. and Mrs. G. Volsey.

Mr. and Mrs. Bob Tyler who have spent the past three years in England have taken up residence in their home in Champion.

The Wednesday afternoon holiday was discontinued Aug. 9. This will be in effect until after harvest.

A Feast of Honor for you and your family—this Saturday Nite Aug. 12th. Will Rogers in "Down to Earth."

Miss Kathleen Young of Nanton is a guest at the home of the home of Mr. and Mrs. Harry Smith this week.

Mrs. J. N. Baubier, who was a patient in the Vulean hospital suffering from the results of a car accident, is convalescing at her home in Champion.

Apricots are scarce. Don't delay. Book your Pickling Cakes now at Campbell's.

Mr. R. I. Baker and Mr. Dobbe of Calgary were visitors in Champion on Thursday.

R. C. A. new sound equipment opened at the local theatre Wednesday Aug. 16th. The feature picture will be "To-Night is Ours." The last word in talkies.

On behalf of the W. I. Mrs. Chamberlain wishes to thank those who kindly donated the use of their cars to take the members to the picnic at Mrs. Martin's.

Dr. Ruth Wood of the medical college Pekin China was guest of Mrs. B. McDonald last week.

The particulars regarding the results of the examinations are not complete enough for publication this week. Next weeks issue will contain a complete list of the successful pupils.

Roderick Hesselwood of Calgary is a visitor at the home of Mr. and Mrs. John Galt.

CHAMPION THEATRE

Saturday Nite August 12

Will Rogers in "Down to Earth"

He kicks off the family high hat—The country's greatest laugh-getter at his funniest. A story flooded with side-splitting humor—A scream from start to finish.

Coming Wednesday August 16

"To-Night is Ours"

With Claudette Colbert and Fredric March

NOTE—The management takes pleasure in presenting this the opening program with our new RCA Sound Equipment. A treat is in store for you. You'll like The Talkies better than ever now.

Gambling With Wheat

Speculators Control Rise and Fall of Grain Market

The ordinary man in the street must be a bit puzzled at the violent fluctuations in wheat. One day he reads that there is a great wave of buying at Winnipeg and Chicago, the central markets for Canadian and United States grain. Wheat shoots up to over a dollar a bushel, ten, fifteen, twenty and even twenty-five cents at a time. The same with corn, rye and barley. Next day he reads that the joyous feelings of yesterday have subsided. Wheat and the other grains have fallen by almost as much as they had advanced. Tomorrow he may read that they have shot away up again. And so the game goes on. Up and down alternately amid frenzied excitement on the part of those who buy and sell grains by the hundred thousand or million bushels, and to whom a matter of a cent one way or the other may make all the difference between being rich or poor.

Weather and other conditions do not suddenly create all that disparity in the value of grain. One does not read of violent fluctuations in the price of carrots, potatoes, cabbages or apples. And yet they are subject to the vagaries of weather and pests in the same way that wheat is. The reason for the gyrations in the grain market, very especially wheat, is the manipulation by speculators who gamble with one of the vital sources of life. They bid for and sell wheat never see and never intend to take delivery of. They possibly would not know wheat from barley if they saw two samples side by side. To them wheat is just something to gamble with. The interest of the millions of consumers means nothing to them.

The going-on in the wheat exchanges were scathingly exposed by Frank Norris in his famous novel, "The Pit," and at that time it was said as if something would result in the way of control of speculation. "When the 'spread' is as much as twenty-five cents a bushel it is a sure sign there is room for reform now," wrote St. Thomas Thomas (Journal).

From Back Of Beyond

Australian Girl Travels 13,000 Miles To Shop in London

Miss Joy Atkinson had to travel 13,000 miles from the Australian bush, riding fifty miles on horseback, and swimming across three rivers in which there are crocodiles, before she could reach London.

"And it was worth it," she said when interviewed. She is only twenty-eight, and has seen so much of life in the raw that it became monotonous. Her father is a cattle rancher.

She has gone to see London for the first time.

"Our farm, or station, as we call it in Australia, is a desolate stretch of country in Northern Queensland. The nearest town is Cairns, a small port 300 miles away."

"The station is larger than the whole of London. We have about 10,000 cattle."

"Our nearest neighbors are eighty miles away, but it is risky paying a social call as they might be out rounding up cattle. That means they might not be home for days on end. The nearest doctor and the nearest cinema are a hundred miles away."

"We have learned to do our own doctoring, and as for the cinema I take a trip of 2,000 miles to Sydney, where I have friends. If I want to see a really good show."

"Motoring? Good heavens, no. There are no roads within miles of the Atkinson station."

Miss Atkinson has been shopping in Bond Street.

"That is what I wanted to do first," she said.

Here is the endurance test Miss Atkinson had to pass before that hour in Bond Street was possible.

After riding fifty miles on horseback and dodging crocodiles in the three rivers across which she had to swim, she made a number of railway journeys in which the trains were held up for hours on end while sand was put on to slippery rails.

Other train services were suspended because the bridges were under water. Her luggage had been sent on two months in advance.

There was great excitement about the liner.

"Man overboard" was the cry. "Gentlemen, overboard with you please," said Mrs. De Snobbe, indignantly. "That's my husband."

"Babies," says a writer, "love bright colors." More hue, less cry.

Italy expects bumper crops this year.

W. N. U. 1906

The Farm Horse

Can At Least Earn Its Keep At Any Time

The contention that man's abandonment of his old friend, the horse, is an important factor in the present economic situation finds strong support in a pamphlet entitled "The Farm Horse" attention is directed to the decline of 6,313,094 in the number of farm horses and mules in the last decade. As a result of this decline:

"At least 18,000,000 acres of crop land, formerly required to produce food, have been put into other crops. This added acreage, augmented by the release of that part of 3,000,000 acres of plowable pasture formerly devoted to horses has resulted in surpluses of various crops and livestock greatly lowering farm purchasing power."

The purpose of this pamphlet is to encourage farmers to turn their attention to raising of horses and mules as a good business proposition. Signs of a return to increased use of horses and mules on farms have already appeared. That increase may for a time serve only to ease an unemployment situation, for not less than one-fourth of the mature horses and mules are said to have been thrown out of work by the tractor, the automobile and the truck. But even a gradual increase in the number of horses and mules would help to check overproduction, and they could at least be made to earn their keep.—New York Evening Post.

Five Ton Sculpture

Work Of Epstein Is Creating a Sensation In London

Jacob Epstein's "Primal Gods," the five-ton sculpture, seven feet by six and one-half feet, is creating something of a sensation in London. The artist has been working on it intermittently since 1910. It is on view at the Leicester galleries, where Epstein's "Crocodyli" drew thousands at the last show.

"Primal Gods" is a centrepiece. Two vast canted slabs of Hoptonwood are carved in deep relief, one with a male and two infant figures, and the other with the spread-eagled male figure known as the Sun Boy. It could be better judged in a park or on a building.

Epstein, master of plastic sculpture, was born in New York, of Russian-Polish parents, and is 53 years of age. He resides in London, England.

Scheme Appears Senseless

Cotton Being Destroyed Although People Needing It Badly

It's a crazy world. Across the line, in the southern states, in the farm relief scheme, no less than 9,000,000 acres of cotton will be plowed under. In return the growers will receive \$10,000,000, divided among those who have signed acreage reduction contracts. If there were no people in need of cotton, it would be senseless to carry out such a scheme; but, all over the world there are people who are in urgent need of the fabric, and need to be told to "burn it, burn it, it's a crazy world."

Sausage Cansing Exported

Many German sausages are evidently going to be served with Canadian castings, for the export of sausage casings to that country in May, 1935, was valued at \$19,000. Many went to Great Britain as usual, the value being \$22,435; to British South Africa, \$13,280; and to the United States, \$9,747. The total to all countries was \$67,529, compared with \$53,007 in April and \$43,847 in May, 1932.

Hens Pay Church Debt

Feathered "Legions of the Lord" have aided in ridding Tennessee Methodist Church of its debt. The idea is claimed by Rev. C. C. Frye. Each housewife was to designate one hen, whose eggs were to be devoted to the church fund. Each of these fowls was designated "The Lord's hen," and their eggs sold and money given to the church. As a result, the church's treasury is \$146 richer.

Past Air Service

Breakfasting in London in the morning, passengers of a new air service will be able to dine the same day in Switzerland. Swiss train connections, fitting in with the airway schedules, will enable one to reach many Swiss resorts in a few hours, while rapid air connections with Italy and Austria also will be available.

Australia is taking advantage of lower dollar exchange to buy more American automobiles.

Terrible wind storms rage 60 miles above the earth, it is believed.

LINDBERGS TO BRAVE ICY MOUNTAINS

Colonel Lindbergh's aerial survey of Greenland, on which Mrs. Lindbergh accompanies him as radio operator, is one of the most hazardous of the numerous aerial exploits. Their task is to survey and photograph the coast and ice cap for possible landing places for the proposed trans-Atlantic air service of the Pan-American Airways. The Lindberghs will twice fly across the icy wastes between Godthaab and Scoresby Bay. An emergency plane is in readiness at their base to fly them if needed. Col. and Mrs. Lindbergh made the hop from Hebron, Labrador, to Godthaab in six and a half hours.

Mecca's Holy Carpet

New One Is Taken To Great Mosque Every Year

The Holy Carpet, which is now being carried with great pomp from Cairo to Mecca to cover the Kaaba in the centre of Mecca's Great Mosque, is made of black broadcloth with tufted corners worn into it in gold and silk.

These carpets are renewed each year, and when the old one is taken up it is carried and sold to the pilgrims fifteen days after the new one is put down.

All carpets have special significance for Moslems. Every one whether used in the home or elsewhere, has an interpretation of its own.

The color decides the meaning. Thus a white carpet means sorrow, a black one means illness and trouble, while red or purple represent dignity, and yellow, honor and promotion.

Search For Crude Oil

Will Endeavor To Locate Field In Alberta To Renew Diminishing Supplies

Efforts to locate crude oil in Alberta will be renewed immediately by Imperial Oil Company, it was announced recently. Work will start on the Courtney stratum, consisting of 7,600 acres, about 100 miles south of Medicine Hat, near Manyanberies.

J. H. McLeod, production manager for Imperial Oil, pointed out that large quantities of crude had to be imported for blending with the naphtha from Turner Valley oil fields of Alberta. He said Montana supplies were diminishing rapidly and there was a possibility unless crude oil was located in Alberta soon, it would have to be imported from distant fields.

The total quantity of solids deposited last year over London, in the form of soot, was 284 tons per square mile. The worst record of this kind was held by Ashington, Northumberland, with 738 tons per square mile.

Art Of Clipping Trees

Dealers Always Search For New Designs In Holland

The art of training and clipping trees in curious designs and in the shapes of animals is rapidly returning to fashion in England, says an article in Pearson's Weekly.

Young trees, to be trimmed and shaped by the gardener, can now be bought for a small sum. Trees already shaped cost a pound and up. The most popular are the topiary, which has a spiral with figure of a bird on the top cost about ten pounds. The largest and most delicate trees may fetch as much as fifty pounds. This does not seem such a lot if money when it is remembered that it may have taken ninety or one hundred years to produce.

Bird figures are the simplest for the amateur topiary to set, and they take between five and ten years to reach maturity. Dogs require twelve of fourteen years' growth, a perfectly rounded ball ten years and a pyramid, 3 feet high, about fifteen years.

Large and intricate designs have to be trained and supported on wires while they grow, but plain bird shapes are made by splitting a bush during its early life, wiring across and trimming every autumn.

Advantages of climate and hereditary skill of her people in the art have made Holland the modern house of topiary, where dealers from all parts of the world search for good designs. The designs are sometimes bought outright, but a particularly good tree will secure for its owner, usually a remote farmer, a substantial cash sum for an "option." The balance is paid some years later when the tree is ready for the market.

Britain is beginning to take a new interest in the art, and there are now extensive commercial gardens where thousands of trees are being raised.

Women are carrying economy too far. We heard of one who had only twenty-six candles on her forty-second birthday cake the other day.

Less Salmon Packed

Industry In British Columbia Behind Last Year's Mark

British Columbia's salmon pack is behind that of last year, according to figures issued by the chief supervisor of fisheries.

So far this year 23,440 cases, each weighing 48 pounds, have been packed, as compared with 42,456 at this time in 1932. In 1931, the pack at this date was 43,363 cases; in 1930, 65,869 and in 1929, 37,146 cases.

This year's pack is made up of the following varieties: Sockeye, 11,350 cases; bluebacks, 8,667; springs, 1,505; coho, 1,234; steelheads, 101.

The bulk of the pack is from the Fraser chum, 96; pink, 3. The largest port area.

Ushers In Outdoor Theatre Uses Bicycles

Incoming Motor Cars Are Safely Guided To Position

One of the first outdoor theatres, where you take your car to the movies, has just installed ushers on bicycles.

The rows of seats are so banked that those in the rear seat of an automobile can see and hear the picture. After two weeks the proprietor discovered that the walk from the entrance to the "seats," or parking place, was so long that the ushers were unable to accommodate the patrons.

So now ushers ride in front of the incoming cars leading the machine with a tiny red light on the rear.

Nominate Many Candidates

C.E. Getting Ready For Elections In British Columbia

British Columbia may be made a testing ground for working out of Co-Operative Commonwealth Federation ideas, as laid down in the recent convention at Regina, if the federation can gain power in the coming provincial elections. This was stated by W. A. Pritchard, former reeve of Burnaby, B.C., who spoke at Vernon while on route home from the Regina gathering.

The federation has already nominated some 25 candidates in British Columbia.

The Worm Turned

A young Yorkshireman had been on the witness stand a long time, bearing as best he could with the nagging and prodding of a flippant barrister, who aimed shafts of wit mercilessly at the unfortunate youth.

"So," exclaimed the barrister sarcastically, "you really do not believe that you could rot an army of Philistines with the jawline of an ass?"

"Well," replied the exasperated countryman, "I might have to try with the article when you're done with it."

Annual loss through forest fire in Canada amounts to approximately one dollar for each man, woman and child in the Dominion, according to government figures.

The explorer Rasmussen once drove 84 miles with dog sleds in one day.

Australia fears a plague of eagles.

Searching For Steel Alloy

World Scientists Waging Secret Fight Involving United States

Today half a dozen nations are engaged in a silent secret struggle for a prize of millions. The light is being waged in laboratories; the fighters are scientists; and the prize is a steel alloy lighter, stronger and more elastic than before.

The nation that wins will be able to revolutionize ship and aircraft construction, bridge designing, building and engineering. The discovery will create a new era in industry and make a vast national fortune.

The object over which the world scientists are fighting is a metal called beryllium. Twenty-five years ago nobody thought it had any use other than as a basis for the necklaces of the beryl worn in necklaces and rings.

But when aeroplanes and modern metallurgy brought a demand for light strong metals scientists turned their attention to beryllium and sought to commercialize it.

Then beryllium's secret was great heights of value. Ten years ago, after a lot of research, it was worth about \$25,000 per pound. Since then, owing to increased knowledge of its uses and the discoveries of fresh sources the price has fallen to \$75 a pound.

For the past ten years the research into the possibilities of beryllium has been intensified. The two leading rivals in the race for the conquest of all its secrets are Germany and Britain.

In Britain the National Physical Laboratory at Teddington are working with X-rays, microscopes and highly intricate processes. In Germany the famous firm of Siemens-Halske, whose works outside Berlin are so vast that they have created a self-contained township, have a team of ten men of science, each working on a special study of beryllium.

Britain's greatest process of beryllium campaign is a young scientist, H. A. Cloman, working at Teddington as a link between science and industry. It is carrying on the work of C. K. Vivian and Dr. Rosenheim, which started ten years ago.

Their great objective was to produce a new process of beryllium metal with a small percentage of impurity is too brittle for use. Dr. Vivian produced a specimen with only one per cent impurity.

Mr. Cloman has spent years of patient experiment and research in eliminating that 0.5 per cent.

With the X-ray he probed the secret of the structure of beryllium, and step by step he slowly discovered how to eliminate the tiny impurity.

Now, at last, he has triumphed. He has produced an ingot of pure beryllium, smooth, polished-like steel, with a suggestion of silver.

The next step is a silent struggle between nations is to apply this vital discovery to industry, to commercialize it, and start the revolution of engineering and trade that will repeat the story of Bessemer steel, radio and airline days.

The nation that has the ore deposits and the secret process can capture the market and lead the world.

Britain is well in the running. We have deposits of beryllium in Aberdeenshire and Ireland. In the Empire, South Africa, Canada, Australia and India have rich deposits.

Can Turn Time Backward

Australian Scientist Says Rocks Contain Indefinite Record Of Their History

A new way of turning time backward, enabling geologists to map with blueprint accuracy the mighty mountain-making, rock-warping cataclysms of the earth's past, has been discovered by an Australian scientist.

The new method was devised by Dr. Bruno Sander of Innsbruck, Austria, who told the International Geological congress about it.

Rocky strata contain their internal structure an indefinite record of all movements they have undergone since their first creation. Dr. Sander explained.

Local Business Essential

In order to be of the greatest value to its community a newspaper must receive local business from subscribers, advertisers and users of printed matter, a sufficient amount to be able to put out a paper with style. The better support our home paper gets, the more able it is to serve the community.

Japanese will build a motion picture producing studio and movie theatres in Manchuria.

Did you ever notice, that in a group picture, you always look worse than anyone else?

FANCIFUL FABLES

THE FAMOUS VIOLINIST WHO WAS A TENNIS FAN

you be the judge

Real Light On Russia.

So many conflicting reports as to conditions in Soviet Russia have been given to the public in recent years, and it has been so difficult to distinguish in such reports what is pure propaganda either for or against the political and economic systems now prevailing in that vast country, that people have developed the habit of shrugging their shoulders when Russia is mentioned and refusing to place reliance in much that is told them. It was, therefore, with unusual interest that delegates to the World's Grain Conference at Regina listened to the first hand knowledge which was brought to them by E. J. Strimman, consulting engineer of Brooklyn, Iowa, who was employed by the Soviet Government for several years in connection with its gigantic plans for the mechanization of agriculture as part of its famous five-year plan.

Mr. Strimman had no political axe to grind, he had no propaganda to spread. He merely told an unvarnished story to the assembled world grain experts of the situation as he personally knew it to exist in Russia. And inasmuch as agricultural development in Russia cannot but have a direct effect on agriculture in Western Canada, it is of interest and value to have Mr. Strimman's first-hand information.

Quoting Litvinoff, Soviet Commissioner of Foreign Relations, as stating at Geneva last June that "unemployment, wage cuts, and strikes were unknown in the land of the Soviet," Mr. Strimman commented that they were impossible in a country "where bread cards are granted only to the obedient worker." Control of the country's food supply precluded strikes, he said. There is no unemployment because the country's census takes no account of any but the workers who are employed. The country's food supply is so plentiful that the government pays its workers less than it would have to pay in a free market. It is paper money and will not be honored for one nickel on a purchase abroad, or on a purchase of imported goods within Russia, Mr. Strimman explained.

Nevertheless there is wage-cutting in a sense, Mr. Strimman giving the following example: The Soviet Government floats government loans each year, requiring each worker to turn back a part of his wages for bonds. In a fair job it amounts to a month's wages, which he could use for food. The worker feels this keenly, he does not complain.

Russian workers, he continued, by report always poverty stricken, as a whole have had the worst living conditions of any of the workers of their neighboring countries in Europe. The Russian could meet conditions in his plodding peasant life, but uprooted and sent to work in the cities taken from him, he has no way to cope with winter's cold and the fearful winter hunger. The food supply available to Russian workers has fallen off in quantity steadily since 1928. Clothing, bedding and shoe supply are reduced to almost nothing. Housing has become more and more congested in the industrial and agricultural centers promoted by the Soviet.

Describing the system of farming, Mr. Strimman said farmers lived in villages going out to farm their own individual strips of land. Throwing this farm into collective farming was a process of evolution, he said. The farms in one unit. These collective farms were established before the State farms. The State farms were designed as models in each section for collectives and communes. Exorbitant taxes, no right to purchase, the possibility of fine as an enemy of the plan, and the promise of machinery through the government on their collectives quickly brought 90 per cent. of the farmers into collectives in the great drives of 1930 and 1931.

A Soviet State farm is never an independent farm in the western world sense. It remains only the link in a vast network of farms, with Moscow as the centre from which emanate all plans, orders and supplies. The man directing these farms is not often an agriculturist nor even an engineer. The entire crop is wheat.

State farms are under the direction of a resident farm superintendent. He has several assistants, all with offices and residences in the main settlements. There are directors of the institute, the experimental station, and of grain production. Each of these have further assistants, the number ever growing without end. All are salaried, and all are manual labor. The administrative class grows larger and the working class relatively smaller. More and more offices are required and more desks to put in them. The working class gains recruits from only the more remote districts and in the seasons of intensive work they are known as "punch bricks." Now, however, in 1933, it has become necessary to drive the office class back to the farm.

Describing how everything is centralized in Moscow, how even a practical director of a State farm had to wait for orders to begin an operation on his farm that he knew was long overdue, but which, although controlling perhaps thousands of workers, he had no right to start without definite orders from Moscow, Mr. Strimman said:

"One question looms large in looking over the situation in this modern world sense. How did the government get control over a vast country and over the destinies of all who live in it? The answer is simple; the government of the food supply. Why should any people's government need to hold its people by such a strong leash? Because the government is of the minority party, representing five to seven per cent. of the entire population. One wonders why do not more Russians join the Communist party and share the privileges which attend the 'party membership' in Russia today? The answer is that it is made very difficult for a Russian to join the party, and of late only the children of Communists are allowed to join."

Everything, down to the smallest detail, is dictated from Moscow, and control maintained through a collection of fines, taxes and shares of crop. There is never any lessening of centralization by any such name in official circles. It is always neatly explained as an increasing of power in some particular field. This brings us to a very important consideration in a government dominated by five to seven per cent. of the population and it is this: Party Men must be kept in all the major agricultural posts, regardless of ability among "communes" because these officials lie the power to control food, production, farming methods, all expenditure, education of the worker and his family. Thus it is the concern of the government in appointing men to these chief posts that they are "safe" and "good party men." That is the reason why Communists insist that "politics and farm engineering cannot be separated."

Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and the patient is in a dangerous condition. For curing diarrhea as quickly underlies the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels but at the same time it is a powerful stimulant and braces up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Manufactured only by The T. Millum Co., Limited, Toronto, Ont.

Grain Deterioration

Saskatchewan Research Workers Develop Method For Treating Damp Wheat

The practical value of the World's Grain Exhibition and Conference is revealed again in addresses contributed to discussion at the conference side of this mammoth gathering by Dr. R. K. Lamson, J. S. Clayton, and C. L. Wrenshall, of the laboratories of the University of Saskatchewan. These men have been experimenting with wet wheat, with a view to eliminating the development of heat and consequent deterioration of the grain before it reaches the driers at the head of the lakes.

Undue rain seasons have not been a common thing in the agricultural life of prairie Canada of recent years, and yet on occasions we do get protracted rainy spells that carry their threat to cut grain. The three Saskatchewan scientists mentioned have developed a vapor called toluene, that is held to be not inflammable in the slightest and that carries no danger to the quality of grain, but that effectively prevents damage from heat, mustiness and fungi in the grain consequent upon wet weather.

This would seem to represent a distinct advance in agricultural science, and that Saskatchewan men have been able to reproduce this treatment and impart it to the World's Grain Conference will be a matter of satisfaction to all citizens of this province. Regina Leader-Post.

Maxims Of His Majesty

Rules For Life Conduct To Workmen At Buckingham Palace

An English journal in its current issue gives favorite quotations of celebrated people, and among them, clearly how many men and women whose names and deeds are known through the world force of their fame by recalling great sayings and sentiments. This list of great people is headed by His Majesty King George and his list of quotations is quite clearly reproduced for its own sake as well as for the edification of the one who uses it. These sentiments that hang in his workroom at Buckingham Palace read:

Teach me to be obedient to the rules of the game.
Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other.
Teach me neither to proffer nor to refuse cheerfully.
If I am called upon to suffer, let me be like a well-bred beast; that goes away to suffer in silence.
Teach me to win if I may; if I may not, let me be a good loser.
Teach me neither to cry for the moon, nor to get up spilled milk.

There is a fine philosophy of life in these various maxims. Their reading enables one to understand better the wisdom and restraint and good sense and understanding usefulness of King George during his reign. Humble folk fighting life's daily battles may find some inspiration these maxims. They are here given to that end. Regina Leader-Post.

Round Up Criminals

International Organization Formed To Conduct Drive On Crooks

Police forces of the world organized recently in Chicago the "international world police" to chase the criminal from his haunts over the globe. The new international organization was formed at a meeting of Canadian, American and European police officials attending conferences sponsored by Barron Collier, special deputy police commissioner of New York, the international police conference, and the international association of chiefs of police. Winnipeg was represented by Chief Chris H. Newton.

Prefers Native Workers

Many thousands foreign residents in Chile are affected by a new law stipulating that 80 per cent. of the workmen and office workers must be Chilean nationality. Many will have to leave the country to seek work elsewhere. If the foreigner has been in the country 10 years, or is married to a Chilean, he will be exempt if he is performing duties for which a native is unskilled.

Club Will Be Exclusive

Aviators who have crossed the north Atlantic alone are going to form a club. Plans for the organization were discussed by Aimee Earhart Putnam and her house guest, Captain James A. Mollison. They broached the idea to Wiley Post, world solo flyer, who expressed approval. Col. Charles A. Lindbergh, Jimmie Mattern, the other eligibles, also will be invited to join.

London haters recently gave to charity 2,000 old hats left by customers.

Recipes For This Week

(By Betty Barclay)

STUFFED TOMATO SURPRISE

(Serves 6)

- 6 medium tomatoes.
- 1 tablespoon gelatine.
- 2 tablespoons cold water.
- 1/2 cup lemon juice.
- 1/2 cup boiling water.
- 1/2 cup orange juice.
- 1/2 cup shrimps.
- 1/2 cup diced celery.

Mayonnaise.
Mint sprigs (or stuffed olives or pimiento).

Peel tomatoes and remove centers. Invert and chill. Soak gelatine in cold water 5 minutes. Add boiling water. Stir well. Add lemon and orange juice. Pour into a pan of the right size to make a gelatine layer 1/2 to 3/4 inch thick. Chill until jelly is solid. Cut in cubes. Half fill tomato shells with shrimps and celery blended with mayonnaise. Then pile shrimps as well as possible with lemon jelly cubes. Garnish with mayonnaise which may be colored green with spinach juice or vegetable coloring if desired. Decorate with mint sprigs. Stuffed olive slices or pimiento. Serve very cold in lettuce cups.

BRAN DELIGHTS

- 1 1/2 cups sifted flour.
- 1 1/2 teaspoons combination baking powder.
- 1 1/2 teaspoon salt.
- 1 1/2 tablespoons grated orange rind.
- 1/2 cup butter or other shortening.
- 1/2 cup sugar.
- 1 egg, well beaten.
- 1 1/2 tablespoons milk.
- 1 1/2 tablespoons orange juice.
- 1 1/2 cups bran flakes with nuts.

Sift flour once, measure, add baking powder and salt, and sift again. Add orange rind to butter and cream thoroughly. Add sugar gradually and cream together until light and fluffy. Add egg, milk, and orange juice, beating well. Add flour; then add flakes and bake on ungreased baking sheet in hot oven (425 degrees Fahrenheit) 5 to 10 minutes. Makes 4 dozen cookies.

Hourly Nursing Service

New Departure In Nursing Is Established At Edmonton

To meet prevalent conditions, and following along lines of nursing organizations in other cities, the Edmonton Graduate Nurses' Association has organized a hourly nursing service in connection with the graduate nurses' registry.

Hourly nursing means that patients may secure to establish hourly care in the home for stated periods as they desired, and it is necessary to comply with medical care. This form of nursing is similar to visiting nursing, except that hourly nursing is paid for on a time basis rather than on a visit basis.

The Graduate Nurses' Association is anxious to establish hourly nursing and is fortunate in establishing it under the graduate nurses' registry. The patient, nurse and community are thus in a position to benefit from an organized nursing service. This nursing service, in whatever capacity it is administered, will be with the cooperation of the medical profession.

Commodity prices in the Netherlands are rising.

Vimy Ridge Memorial

Underlining Which Is Not Yet Completed, Is Massive In Conception

The memorial on Vimy Ridge, which Canadian dividers call "the Thirtieth British Brigade of West Kent and Scots" stormed in April, 1917, is not yet completed fifteen years after the Armistice. But it is an undertaking massive in conception, on 240 acres 200 feet above the Douai Plain, and designed to be worthy of a victory of which Sir Douglas Haig said: "The capture of the renowned Vimy Ridge is an achievement of the highest order and of which Canada may well be proud." It was fitting that the sculptor should be a Canadian, Walter S. Allward, for it was an award that was open to the British Empire. Since 1925 he has been engaged on the work in a London studio. "All the time," he says, "I have sought to avoid any semblance of drum-beating. Canada mourns her dead in the way I have endeavored to show in the Mother Spirit, which stands with drooped head on the wall, brooding over the plain on which her son fell. Sorrow, but not victory, is there." Blocks of from twelve to twenty tons were required, and they were found in an old Roman quarry in Yugoslavia, from which he was to build the Palace of Diocletian in the third century was taken.

The common cause of France and Canada is to be represented by twin pylons 138 feet high. Below them will be seen the Spirit of Sacrifice in twenty heroic figures grouped at the end of a wall 237 feet long, the base of the memorial. Surmounting the pylons will appear in relief Peace, Justice, Truth and Knowledge. The design calls for the covering of mounds of guns along the base by olive branches and laurel. The memorial should be ready for dedication on Dominion Day next year. The approaches will be by avenues of pines grown in Canada and France.

In F. J. McKenzie's "Canada's Day of Glory" may be read the breathless story of the capture of Vimy Ridge. A Canadian correspondent, he does justice to the part the men of Kent and Scotland played in that immortal feat of arms. The dedication would not be adequate without the presence of the commander of the troops engaged, Sir Julian Byng, Governor-General of Canada from 1921 to 1926.—New York Times.

Canadian Legion At Tokio

Structure Nearly Completed and Will Be Open Ready For Occupancy

It is understood that work on the Canadian legion in Tokio is progressing rapidly and that the structure will be ready for occupancy. The occupancy of Hon. Herbert Marler, Canadian minister to Japan. While no official statement has been given by the government, it is for the fact that Mr. Marler, on the occasion of his last visit to Ottawa, urged upon the government the advisability of going ahead with the legion construction so that advantage might be taken of the low costs of labor and materials. It is only opposition to the scheme that has been the main reason for the delay. The government is now working on a project which could not be described as absolutely essential. Long term planning is being arranged, however, and the work has been in progress some time. It is expected a statement will be issued by the government shortly.

Coffee exports from Haiti this year have exceeded all expectations.

A Genius For Organizing

Lord Of Thousand Ships Was Millionaire At Thirty-Nine

One of the reasons why the "man from the sea" is called "the Brig" was the organizing genius of Sir John Ellerman, son of a German bookkeeper. Sir John died recently in France, but in a hundred ports from Southampton to Sydney, his flag is flying on the ships which keep Britain supplied with the seas.

It was quite appropriate that Ellerman, the ship owner, should be the wealthiest man in Britain, whose life and property depended upon sea-borne commerce. A few years back when many values had not flown so far as they have today, Sir John's wealth was estimated at from \$100,000,000 to \$300,000,000. That put him far ahead of any other Britisher and in the limbo of Lord and Rockefeller class. Even today the thirty British are calculating that the nation will collect \$67,000,000 in death duties.

The Ellerman career, like that of Sir Thomas Lipton, proved that the art of being a self-made man bears no American patent. Ellerman rose from the humble place of black-coated English clerk in a shipping office. By 39 he was a millionaire. By 60 he owned one-eighth of all the British shipping.

He was feudal in a nation where somewhat free spending is the tradition of the wealthy. He never owned a yacht or a racing stable. It was said in the city that he never spent more than 5 per cent. of a year's income. The rest went into ships and more ships, and he owned a large chunk of London—and newspapers. One time his newspaper holdings rivalled those of Northcliffe. But Ellerman never shared Arthur Harmsworth's passion for political activity. He was content to collect the dividends and let the other men advise the cabinet.

Move Settlers North

Settlers In Drought Stricken Areas Of Southern Alberta To Go North

The Alberta government and the railways have agreed to share the costs of moving about 150 settlers from drought-stricken areas in southern Alberta, and only decision of the Dominion government as to its share in the project is awaited, according to Hon. George Hoadley, Alberta minister of agriculture.

The settlers will be moved to more favorable areas in northern Alberta.

Barley As A Food

Mentioned in Exodus 9:31, and in other books of the Bible, barley was one of the most important foods of the human race for thousands of years. Here meal, as barley meal is called in Canada, forms a favorite dish of porridge at the present day.

In the opinion of a dentist, soldiers make the best patients. They are thoroughly accustomed to drilling.

WORLD HAPPENINGS
BRIEFLY TOLD

It has been officially announced by Ottawa, Monday, October 9, would be the national Thanksgiving Day for Canada.

Henry Ford recently passed his 70th milestone, in excellent health and so engrossed with many interests that he has no time think of such things as retiring.

Cherbourg has opened a \$2,500,000 maritime station, 920 feet long and 138 feet wide, in which Paris-bound travelers will be transferred from ships to special trains.

C. Barclay Drummond, vice-president of the Mechanical Engineering Company, died recently in Montreal, after a long illness. He was 38 years old and a son of the late Dr. William Henry Drummond, the noted poet.

East Coulee miners of the Drumheller Valley coal fields, on strike against wage reductions, have, in two months, demanded 15 per cent. salary increases. Five thousand are affected by the strike.

Thirty-three thousand, three hundred and seven sheep, 22,871 cattle, 126,248 hogs, and 32 calves were shipped from western to eastern Canada during the first 24 weeks of this year.

Nelson's personal log book has been handed over by Prime Minister Ramsay MacDonald to Sir Giles, his director and principal librarian of the British Museum. The entries in the book are in the admiral's hand.

The mobilization of Mexico's resources for rehabilitation of her economic life through a six-year program has begun under the command of General Plutarco C. Calles, former "iron man" and former president of Mexico.

Columbia revenues for the first quarter of the present fiscal year were \$40,000 greater than for the corresponding period last year, states Hon. J. W. Jones, Minister of Finance. Receipts were \$5,810,000, compared with \$5,750,000.

The first calving of new wheat from Manitoba was loaded at the elevators at Oreston, Man., with wheat from the farm of D. Klassen. The grain was an excellent sample, grading No. 1 hard and indicated a yield of 16 bushels to the acre.

Test H.B. Route

Will Investigate High Insurance and Cargo Rates

The Federal Government is prepared to consider the feasibility of tests by Canadian government fleets of the Hudson Bay route before the present accepted season and after the season, it is indicated by Edward Evans manager of the Canadian Saskatchewan stock yards at Moose Jaw. The suggestion is the result of the recent Saskatchewan stock growers conference and its decision to determine the justice or otherwise of existing high insurance and cargo rates. Mr. Evans has received notification that an official of the Federal Department of Trade and Commerce will shortly come to Saskatchewan to discuss the proposal.

New Law Has Precedent

Death Penalty For Kidnappers In Year 1965

If New York state legislators decide to enact a law providing the death penalty for kidnappers, as has been urged, they will have precedent in the colony's first English laws, and precedent is dear to the legal mind.

On March 1, 1665-200 years ago—were promulgated the Duke of York's laws which named 12 offences for which the death penalty was inflicted. One of them was kidnapping. It read: "If any person forcibly steal or carry away any man or mankind, he shall be put to death."

Avalanche Victims Found

With the melting of the snow on the Swiss Alps six of 13 avalanche victims have been found, 7,500 feet above Locarno. The 13 were smothered by sugar and coffee across the frontier when the avalanche swept them from a pass and buried them under snow, ice and rock 3,000 feet below. Search for the remaining seven is being continued.

Not All Superstitions

A ten-minute checkup on the person trying to negotiate a ladder set up on the sidewalk in Sacramento, California, was as follows: Of the forty-six women passing, thirty-four walked around and thirty-three of the sixty-nine men did the same. Twenty-three men and twelve women walked under. Possibly some one will want to be hit with a brick—or a golf point.

W. N. U. 2006

Work Of Banking Commission
Monetary System One Of Many Things To Be Studied

The terms of reference under which a banking commission of Lord McMillan, Premier of Ontario, and Beaudry Lemay, of the Banque Canadienne Nationale, Montreal, will inquire into the monetary system.

It is desirable that the approaching periodic revision of the Bank Act shall be based on a complete and detailed examination of the provisions of the act and of the functions and operations of the banking system.

It is also desirable that such examination should include a study of the facilities now afforded by the Finance Act and a careful consideration of the advisability of establishing a central banking institution, and, if so established, of the relation of such central bank to existing banks and its proper authority and function to the operation of the banking system.

That such examination should also include a study of the entire monetary system of Canada, including credit, currency and coinage, particularly in their relation to commodity price movements and fluctuations in international trade.

It is also advisable to consider whether and in what respect the banking institutions and the monetary system of Canada may be modified, extended or developed for the purpose of facilitating inter-provincial and international co-operation in public policy designed to promote the revival of domestic and foreign trade and enterprise and the general increase of employment and to insure a greater measure of stability in respect thereto.

Winnipeg Newspaper Union

By Ruth Rogers

Miss Foster again as principal and assistant in history. All leading academic standing of a high order and with tested teaching experience, the members of the staff are specialists in pursuit devoted to the educational and aesthetic development of cultured Canadian youth. Among the principal are: Miss Barbara May Erith, B.A., Toronto in Science and Mathematics; Miss Margaret Wilson, B.A., Toronto in Science and Mathematics; Miss Florence F. R. Mew, of the Margaret Eaton School, in Physical Education; Mrs. Donald Munroe, Manitoba Agricultural College, as home manager.

And don't you think the slender as well as Laura Cull, are Miss Sadie M. Gregory, B.A., of Manitoba University.

RIVERBEND SCHOOL FOR GIRLS

Manitoba Institution Devoted To The Educational And Aesthetic Development Of Young Canadian Womenhood

Attended by success from its inception, Riverbend Schools for Girls, Winnipeg, will continue its work as the boarding day and boarding school for girls with the reopening in September, according to the prospectus just put in press. A hundred per cent. academic record was again maintained under the 1933 results of the departmental examinations appeared in July, a tribute to the efforts of the teaching staff.

The school was established in September, 1929, under the auspices of the United Church of Canada, standing with one building, the home of the late Sir James Aikins, purchased to the church for the purpose of establishing a boarding school for girls.

Regularly inspected by the department of education, the school has found scrutiny with a proud record, its student body, fully aware of the significance of establishing tradition for their Alma Mater.

Riverbend begins the fall term with a teaching staff of fourteen, with Miss Foster again as principal and assistant in history. All leading academic standing of a high order and with tested teaching experience, the members of the staff are specialists in pursuit devoted to the educational and aesthetic development of cultured Canadian youth. Among the principal are: Miss Barbara May Erith, B.A., Toronto in Science and Mathematics; Miss Margaret Wilson, B.A., Toronto in Science and Mathematics; Miss Florence F. R. Mew, of the Margaret Eaton School, in Physical Education; Mrs. Donald Munroe, Manitoba Agricultural College, as home manager.

And don't you think the slender as well as Laura Cull, are Miss Sadie M. Gregory, B.A., of Manitoba University.

Preventing Barn Fires

Adequate Use Of Salt Retards And Prevents Spontaneous Combustion

The Ontario Fire Marshal's reports show that more barns are destroyed by fire originating from spontaneous combustion in hay than from any other cause except lightning in un-mowed barns.

Harvest weather conditions in 1932 were so dangerous that more barn fires than ever were expected. Instead there were 275 fewer barns burned in Ontario and a decrease of 17 per cent. in the number of fires known to be caused by spontaneous combustion.

Credit for this is given to the more general use of salt. The adequate use of salt is the most certain way of retarding and preventing spontaneous ignition fires.

Sweden is buying more American low-priced passenger automobiles than in 1932.

Australia's wool clip is estimated at 2,942,500 pounds.

Dangers For Pedestrians

Five Are Listed For Guidance Of Careless Walker

Five principal danger spots lurk in traffic for the unwary pedestrian, according to an analysis of accident reports. A large proportion of traffic deaths involve persons on foot and the circumstances, listed in the order of their frequency, are: Crossing the street between intersections; crossing at intersections; coming into the street from behind parked cars; walking on or along rural highways, particularly when falling to walk facing oncoming traffic; and children playing in the street.

Duty On Melons

The value for duty purposes on cantaloupes, muskmelons, honey balls, and other melons, from August 1 to October 31, has been fixed at four cents per pound, an announcement of the Department of National Revenue. This valuation applies to the intermediate or general tariff.

London Advertiser.

Canada's Hospitals

How well equipped the great majority of Canadian hospitals are is proved by the fact that out of the 863 given as the total, no fewer than 448 maintain their own X-ray departments, while 324 have their own clinical laboratories and 218 their physical therapy departments.

John Dwyer, who died recently in Thurles, Irish Free State, aged 90, was blind from early youth, but developed so fine a sense of touch that he could repair watches and clocks.

Egypt's imports of leather have declined 80 per cent. in the last four years.

HANNAH

Golden Text: "A woman that feared Jehovah, she shall be praised." Proverbs 31:30.
Lesson: 1 Samuel, Chapter 1, 2.
Devotional Reading: Psalm 128.

Explanations and Comments

Hannah's Prayer For a Son, Chapter 1:1-11—Hannah and Elkanah, her husband, went regularly every year to the sanctuary at Shiloh, there to worship and offer sacrifice at one of the great religious feasts, probably the Feast of Tabernacles, or Feast of Tabernacles, which was held after the grape and olive harvest. The sanctuary was the tabernacle. The temple was not built until about a hundred years afterwards.

As was customary, after a portion of the sacrificial victim was burnt at the altar, and another portion had been given to the priests, the family took of the rest within the sanctuary precincts. But Hannah could not eat, for sad and bitter thoughts filled her mind, as she contrasted her childless lot with that of Peninnah, Elkanah's other wife, who was blessed with many children. After the meal was over she presented herself in the temple to pray to Jehovah. Her prayer was accompanied by many tears, as, standing with her head bowed, she made her vow that if Jehovah would bless her with a boy, she would consecrate him all the days of his life to Jehovah.

Hannah prayed for a child from God, that she might give him back to God. Praying for gifts that we may give them back to God has in it a high and noble motive. Do you pray for money that you may give it to God? If so, wealth will never be your reward. Do you pray for money to live for God? If so, the largest possible blessing will be a blessing from God.

Every child who declared that the child should be a Nazirite, one set apart to the Lord, of which his unshaven head was a token. The children of the marks of the Nazirites were the refraining from wine and all intoxicating drinks, the letting the hair grow, and the avoidance of defilement by touching the dead.

Every child in a truly Christian home is a dedicated child. He is committed to God to serve in so far as one person can commit another. His is written in the Book of Life. In pencil it is true, which may be rubbed out. Still, his name has been written in the Book of Life, and he is being trained for it—R. C. Gillie.

Prompt and Efficient

Member of Detroit Automobile Club Tells Good Story

Depression or no depression, some American organizations continue to give prompt and efficient service. Take the case of the Detroit Automobile Club. A friend of ours who is a member of this club writes:

"I had a little car smash recently, and presently received a letter from two lawyers demanding that I pay \$200 for damages to the other car. As I felt the accident was not my fault, I sent the letter to the automobile club, and the next day both lawyers were struck by lightning. Personally, I think that is carrying things too far, but I suppose the automobile club knows what it is doing!"

London Advertiser.

Canada's Hospitals

How well equipped the great majority of Canadian hospitals are is proved by the fact that out of the 863 given as the total, no fewer than 448 maintain their own X-ray departments, while 324 have their own clinical laboratories and 218 their physical therapy departments.

John Dwyer, who died recently in Thurles, Irish Free State, aged 90, was blind from early youth, but developed so fine a sense of touch that he could repair watches and clocks.

Egypt's imports of leather have declined 80 per cent. in the last four years.

Foretelling End Of World

Prophecy Always Find Credulous People Who Believe Them

Once again a prophecy has been made to look foolish by foretelling the end of the world on a certain date which has gone without anything happening. In this case it was a rich business man in London, who if he was a Christian might manage a successful business, could to have been able enough not to believe such foolishness. Yet he had sufficient faith in his beliefs to give away much of his wealth before the prescribed date, and unfortunately he persuaded a number of others to do the same. Today they are all colder and wiser men.

It is strange that this sort of crankiness occurs from time to time. It has happened in nearly every country under the sun, and the procedure is the same in every instance. The prophet induces credulous people to whom he transmits his "religious mania" to give away almost everything they possess on the ground that they will stand a better chance of entering the Kingdom of Heaven if they are as penniless when they leave the world as when they came into it. The fact that the end of the world has been predicted often without result does not appear to deter other prophets from arising.

At Chatham, England, not far from London, is a huge building known as "Jezebel's Tower," about the size of Katoor's store in Toronto, which was erected about sixty years ago by a religious fanatic known as "Jezebel." He caused thousands of people to believe that the world would end on a specific day, and they subscribed a huge sum of money to build this place so that they would all assemble within the walls in preparation for the day, together and pass into the Kingdom. Of course nothing happened, but a large number of dupes retained their faith in the prophet and for that matter, they still call themselves the "Jezebelites," and can be distinguished by their mode of dress—St. Thomas Times-Journal.

Music That Endures

Old Composers' Work Outlasts Modern Song Hits

The mechanism of music has reduced a song hit's popularity to about three months, a society of composers and publishers complains. So the old order changes. A composer's problem used to be to get a hearing for his song. Now he has to figure out a way to prevent it from being heard too much.

Still, those three Bs—Bach, Beethoven and Brahms—seem able to gain something from the new song hit, the familiarity offered by the radio. It's the writers of blues that are blue.—Christian Science Monitor.

Cannot Be Classified

Two fishermen have caught a marine monster that defies classification. "Tadpole" was named. The strange creature has the head and body of a reptile and the gills and fins of a fish. Powerful jaws enclose fangs nearly an inch long. The body is large and muscular for about 15 inches behind the head, then tapers off rapidly into a dark, scaleless, reptile-like tail five feet in length.

Source Of Supply

Teacher—"What are the products of the West Indies?"
Boy—"I don't know."
Teacher—"Come, come! Where do you get sugar from?"
Boy—"We borrow it from next door."

Glad to Get Back

The many friends of Mr. and
Mrs. R. Tyler will be pleased to
hear that they have again
taken up residence in their
home here after a two years
sojourn in London, England.
It is understood that Mr. Tyler
found the London for highly
inferior to Alberta's climate
and was not averse to the trip
back to sunny Alberta. Mr.
Tyler is looking well and feel-
ing well, and very glad to get
back to Champion. The return
journey was made in seven
days and was highly enjoyable.
Bob says he only missed two
issues of the Chronicle during
his stay in England.

School Meeting

The regular meeting of the
Board was held Tuesday, Aug-
ust 4, 1933.

James Brown, F. Flem-
ing and F. Alder, H. Cooper
Secretary.

Acts were submitted and
passed.

Coal Contract was awarded
to Gordon Stewart at \$9.00
per ton.

Van Routes were arranged as
follows: Long South West, F.S.
Recher, S. Fath, J. M. Moffatt.
Short South West, F. Alder, T.
G. Alecock, F. Holm. North
East, G. F. Smith, W. Ulfich,
H. E. Gill. South East, Mrs. C.
Anderson, A. Barberis, G. Tay-
lor, H. E. Gill, and F. Fleming.
Arrangements with F. Gotten-
berg were made as in 1932.

Messrs Warren and McCull-
ough attended the meeting in
connection with Grade XII
work, action was deferred until
August 18th.

Lost Money Found

Marvin Snow, a man hired
by O. B. Smith, prominent
farmer here, while at work
summerfallowing, picked up a
pocket book the property of
Jack McDonald, that had been
lost for more than three years.
The pocket book contained \$67
in bills. When first missed it
was supposed that the fold had
dropped from Mr. McDonald's
pocket while plowing and was
given up as lost. The bills
barely discernible and some
were practically destroyed,
however on forwarding some
to the head office of the Cana-
dian Bank of Commerce, the
entire amount was paid.

A shower claiming Miss Kate
Pharis as hostess, was held on
Friday complimentary to Miss
Blanche Schooley a bride select
week. Entertainment was pro-
vided in games and music after
which a complete set of green
and white kitchen utensils was
presented to the bride by Mr.
Twenty-two guests were present.

W. S. Ryan of Warner, was
a visitor in town Wednesday.
Mr. Ryan has just returned
from the World's Fair in Chi-
cago.

In Memoriam

In loving memory of our dear hus-
band and father, Teasdale Brown,
who passed on, on August 10th, 1932,
"Safe in the arms of Jesus."
Always remembered by his wife and
family.
